

Setting Up & Configuring Visual Studio Code on Windows

Step 1: Download Visual Studio Code

1. Visit the official VS Code website: <https://code.visualstudio.com/>
2. Download the Windows version.
3. Run the installer and follow the on-screen instructions.
4. Select the options to add VS Code to PATH during installation.

Step 2: Install Extensions

1. Open VS Code and go to Extensions (Ctrl+Shift+X).
2. Search and install:
 - Python
 - Flask Snippets
 - GitHub Integration

Step 3: Configure VS Code Settings

1. Open settings (Ctrl+,) and configure Python interpreter.
2. Set up the default terminal to PowerShell or Command Prompt.
