

# Installing & Structuring Flask in VS Code

## Step 1: Install Flask

1. Open VS Code terminal.
2. Run: ``pip install flask``

## Step 2: Create a Flask Project Structure

...

/MyFlaskApp

  /static

  /templates

  app.py

  requirements.txt

...

## Step 3: Running the Flask App

1. Inside VS Code terminal, run:

...

`export FLASK_APP=app.py`

`flask run`

...
